RANIN FAHMITHA R

Data Analyst

Woodlands, Singapore | 89876844 | raninrafa2004@gmail.com | Github | LinkedIn

EXECUTIVE SUMMARY

Data Analyst in Woodlands, Singapore, with hands-on experience in data cleaning, EDA and interactive dashboards from two analytics internships and end-to-end projects. Proficient in Python, SQL, Excel and Power BI (DAX), with a solid understanding of statistics and predictive modeling.

EDUCATION

Anjalai Ammal Mahalingam Engineering College, Tamil Nadu — B.Tech IT *Nov 2022 – May 2026*
CGPA: 8.50 / 10

- Presented AI-based projects and participated in a debugging workshop.

TECHNICAL SKILLS

Programming & Tools: Python, SQL, Excel, Power BI.
Data Analytics: Data Cleaning, Data Visualization, EDA, Statistical Analysis, Data Warehousing.
Machine Learning: Regression, Classification, Predictive Modeling, Data Preprocessing.
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn.
Database Management: MySQL, MongoDB.
Software Engineering: Agile & Scrum, Version Control (GitHub).
Other Skills: Problem Solving, Critical Thinking, Communication.

EXPERIENCE

Data Analytics Intern — Velozity Global Solutions *Jun 2025 – Jul 2025*

- Analyzed 500 candidate records using Python, SQL & Power BI for data cleaning, EDA, KPI analysis, recruitment funnel analysis, and built an interactive dashboard for reporting.

Data Analytics Intern — Jorim Technology Solution Pvt. Ltd *Feb 2026 – Jun 2026*

- Performed exploratory data analysis and built interactive analytics dashboard using Python (Pandas, Matplotlib), SQL, Power BI (DAX) and Excel to analyze hiring metrics.

PROJECTS

1. Telecom Customer Churn Analytics & Prediction

- Developed a telecom churn analytics and prediction system through data preprocessing, feature engineering, customer churn analysis, and building Logistic Regression and Random Forest models.
- **Output:** Identified high-risk customers using churn probability and model insights, with an interactive Flask application providing visual analytics, feature importance, and downloadable churn reports to support data-driven retention decisions.

2. Recruitment Analytics

- Developed a Recruitment Analytics solution using Python, SQL, and Power BI for data cleaning, EDA, KPI analysis, and recruitment funnel analysis.
- **Output:** Built interactive dashboard to analyze candidate selection, recruitment-source performance, application trends, skills and data-driven recruitment insights.

CERTIFICATIONS

- AI Course – Rinex.AI (with Google)
- Software Engineering – IIT Kharagpur
- Python, DBMS – Meta
- Version Control – Meta
- Software Engineering Simulation – J.P. Morgan (Forage)
